

KNOW THE '4 T'S' OF TYPE 1 DIABETES - IT COULD SAVE A CHILD'S LIFE

It's really important to be able to spot the most common symptoms of type 1 diabetes early.

Unfortunately, we know that too many people – mostly children and young people – are not diagnosed until they are in diabetic ketoacidosis (DKA), a life-threatening condition that requires urgent medical attention.

Early action is important and it's good to know the '4 T's' of type 1 diabetes:

TOILET – GOING TO THE TOILET A LOT.

THIRSTY – BEING VERY THIRSTY AND UNABLE TO QUENCH THE THIRST.

TIRED – FEELING MORE TIRED THAN USUAL.

THINNER – LOSING WEIGHT OR LOOKING THINNER THAN USUAL.

If you notice these signs and symptoms, you should contact your doctor **straight away**.

IF YOU WOULD LIKE SUPPORT...

Join our 'Friends of the North' Diabetes UK Facebook group where you can find peer support and the latest information from Diabetes UK, locally and nationally: [Diabetes UK chat: Your Friends in the North | Facebook](#)

Or use your mobile phone to scan the QR code:
